# Transducer Type Thermistor LS Series

---

## Description

Typeï¼š

LS Series

Features :

- Interchangeable tolerances
- Skin & catheter disposable sensor designs
- High quality construction
- Custom designs at a low cost
- Compatible with YSI 400 and 700 temperature monitor instruments

These thermistors offer a precision method of life science and patient care temperature sensing. Our disposable sensors meet the necessity of low cost without compromising high quality and precise accuracy.
